**Wizard Alchemy Blend: Desire**

**Essential Oil of the Month: Spearmint**

**Essential Oil Tincture: Positive Transmission**

**Magick Mister / Massage: True Bliss**

### Desire (Botanical Perfume)

Breathe, relax and let an alpha state of deep-relaxation take over. A gentle woody base of African Copal Bark, Muhuhu reverberating a sweetness amplified by the loud potency of Cinnamon, Vanilla, Nutmeg combined into the correct proportions. This is what came to me as I laid down in shavasana at the end of a yoga class. What was the name I asked at the time of the experience? Desire.

Desire is a delicate botanical perfume that matches sweetness and sexiness with softness and depth. This is one of my personal favorite botanical perfume blends to wear and I am so thrilled to share this with everyone this month! Try rubbing a few drops onto the wrists, neck and around the body for irresistibility ~ YUM!

**Ingredients: Wildharvested African Copal Bark (West Africa), Organic Cinnamon Bark (Sri-Lanka), Wildharvested Muhuhu (Tanzania), Nutmeg Absolute (Indonesia), Organic CO2 Extracted Vanilla (Comoros) infused into Fractionated Coconut Oil with Dead Sea Salts**

### Organic Spearmint (Steam Distilled) ~ Morocco

We received a brand new organic Moroccan Spearmint which is even more incredible than the previous S. African we received. Our members are getting a sneak peak at the spearmint we are moving into after we release our last batch!

Spearmint is an energizing member of the mint family. When I smell this deep-layered spearmint, waves of peace sweep over me and I envision the color green. An incredible culinary enhancement to your favorite healthy desserts at VERY low concentration. Wonderful to use a few drops in your home diffuser. Try adding a few drops into your favorite organic shampoo or conditioner to give you a boost each morning! What is your favorite way to appreciate Spearmint?

**Ingredients: Organic Spearmint (*Mentha spicata*) extracted from leaves - Morocco.**

Essential Oil Wizardry

# Essential Oil Wizardry

## Positive Transmission (Essential Oil Tincture)

Special formulation developed on Big Island Hawaii while I was living with my essential oil mentor Ravi Das. After several ceremonies, we had the complete honor to brew a large vat of ayahuasca over the course of a week. Around this time, discussion of a line of products for ceremonial enhancement was envisioned – Purity & Psychic Protection were birthed, then out came Positive Transmission.

Positive Transmission was blended out of highly sacred roots, woods, resins while I was sitting with the brewing ayahuasca pot. It's intention was to fill a person's experience with more light and remove negative energy from there field. This blend is used 1-2 drops under the tongue, daily. Powerful used with meditation and intention!

**Ingredients: Wildcrafted African Copal Bark, Organic Cedar Atlas (Morocco), Wildcrafted Elemi (Philippines), CO2 Extracted Frankincense Carterii (Somalia), CO2 Extracted Myrrh (Somalia), Organic Tulsi (India), Wildcrafted White Sage (California) infused into Organic Sugar Cane Alcohol**

## True Bliss Oil (Magick Massage Oil)

Imagine yourself after a long day of work, driving through traffic to be called and offered a gift massage at your home! Now you should call a friend from your phone book at random and offer them a Truly Blissful Massage – this playful, joyous blend of essential oils and CO2 extracts were inspired by a previous intern, Mr. Kryn Dykema. Kryn had a true sense for smells and had a fine level of sensitivity to blending/crafting fragrances. Enjoy this warming, refreshing blend for an uplifting, gently stimulating massage to cultivate in your life. Now go give, and go receive a massage!

**Ingredients: Organic Black Spruce (Canada), Fresh Ginger (Indonesia), Wildcrafted Frankincense Carteri (CO2), Wildcrafted Styrax Liquidambar (Honduras), Organic Red Mandarin (Brazil), Organic Spearmint (Morocco) infused into Fractionated Coconut Oil**

## Surprise! (Tooth Alkalizing Fluid)

Really, I do love gifts! This yet-to-be-named concoction was formulated in response to my 3 week journey of healing of a tooth infection. There are times when you need to slow down! Sometimes life needs to humble you a little bit. This formulation was a late response solution to my own healing to help neutralize acids/bacteria in the mouth after meals. Inspired by Uncle Harry's formulation, this one uses it's own ratios, unique essential oil blend and adds a touch of hydrosol for divinement.

To use, use 1-10 drops (likely closer to 1-5) in the mouth and wait for mouth to salivate. Swish activated saliva around to the teeth and gums for several minutes. Suggested for use after meals and upon waking. May my healing journey be a gift to your oral hygiene and my life.

**Ingredients: Distilled Water, Trace Mineral concentrate (Salt Lake), Ionic Silver, Mugwort (California) & Bay Laurel (California) Hydrosols, Prabhupad Immune Blend, Himalayan Salt**
