### Turkish Delight (Partner Alchemy)

Inspired by the eclectic Turkish Coffee, an ethnic medicinal beverage which brings together Mediterranean spices infused into dark coffee bringing more balance to the beverage. This well balanced formulation brings together an intriguing bouquet of Coffee, Ginger, Cardamom, Nutmeg and adds a curve ball with Caraway & Patchouli. Like a warming cup of sensual coffee that breaths celebration and passionate dancing under the stars ~ this blend screams aye yai yai!

This can be applied onto the body as a botanical perfume – some people may appreciate the warming and tonifying effect on the face while others may be sensitive to the small quantity (and ever-so-present) cinnamon in this formula. Quite invigorating, warming and jovial, this blend can cheer up lowered moods – try applying onto the body or rubbing into the feet after a shower/bathtub. Some friends reported infusing this blend into their beverages (teas/coffee).

### Ginger, Steam Distilled (*Zingiber officinale*) ~ Sri-Lanka

Credibly useful botanical extract comes from the rhizome ginger, a warming therapeutic anti-inflammatory spice touted in many cultures around the globe. Ginger warms the core-body temperature (great ingredient in warming massage oils), reduces pain/inflammation and demonstrates anti-tumor properties. This pungent essential oil offers a spicy upgrade to pizzas, soups, salad dressings, sauces and other delicacies. Ginger can be diluted and rubbed over the stomach to aid with gas, bloating and indigestion!
