Pain Relief + (Hemp / CBD Tincture)

Pain Relief + is a classic pain relief formulation with multiple active ingredients and therapeutic constituents. PR + is one of our products that we receive such beneficial feedback about, from people of all ages and ailments. Over the years, I've used this as a general health tonic and targeted toward athletic performance or for injury. My appreciation for this formula has grown during times of true pain afflictions to recognize how effective this is for pain, muscle recovery & injury.

Start off with ½ dropperful and use up to 1 dropperful each day, taken sublingually (under the tongue) and held for 20 seconds as needed for pain. We enjoy using CBD products daily, once each day (typically in AM or before bed) giving 2 days off each week, one week off per month. For people with medical challenges, 2-3x/daily can provide more full spectrum relief throughout the day. May be applied topically!
